evaluation

A. I am not familiar with the JavaScript before. So it takes me a lot of time to learn the function. For the Question 3, I don't know JavaScript has toggle function, I used show and hide function with the same method with 5a. It takes me lots of time. For the 5a, how can I get the ith running time becomes a big problem. When I doing problem 6, I don't know how to recognize whether the time format is " ___ hours ___minutes" or " ___minutes". The 8th problem is a big question. It missed me up. I don't understand what it means.

B. For the question 3, I find the function on the W3C website. For the 5a, I find the movies is an array, which means I just need to get the ith array and operate on ith array. For the 6th problem, I use time as an array. if it's input is two value, the format is "___ hours ___minutes". If not, the format is "___minutes".

C. From these questions. I learned how to use jQuery and how to write a jQuery function.
